DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 allowed.
2. The following is an examiner's statement of reasons for allowance:

There is no prior art fairly teach or suggest a power distribution unit (claim 1) useful in a truck tractor to apply electrical power to a selected one or more of a plurality of signal terminals of a tractor-mounted connector in a tractor-to-trailer electrical connection, the power distribution unit comprising a power bus adapted for connection to a power source, an output terminal corresponding to each signal terminal of the connector, a switch connected between each output terminal and the power bus, and an actuator associated with each switch and operable upon receipt of a respective control signal to operate the associated switch.

There is no prior art fairly teach or suggest a heavy duty truck tractor (claim 9) having a first multi-terminal electrical connector mounted in a rear wall of the tractor and co-operable with a second mating connector at an end of a multi-wire cable extendible to a trailer coupled to the tractor, the improvement comprising a power distribution unit in the tractor in association with the first connector and operable for supplying tractor battery power essentially directly to selected ones of the first connector terminals when desired, the power distribution unit comprising a power bus connected directly to the battery, a respective switch connected between the power bus and each one of the selected first connector terminals, each switch having an actuator, each actuator being a component of a respective control circuit powered by the battery
